Career Objective

Aspiring Software Engineer | AI • Computer Vision • Full-Stack Development

My work spans full-stack web platforms, computer vision applications, and browser-based games — built with Python, Java, React.js, OpenCV, MediaPipe, Firebase, and MySQL.

Education

- Senior Secondary Education (CBSE) • PCM** 04/2024 – 12/2026 | Kota, Rajasthan
Vidyanjali Academy
- Secondary Education (ICSE) General Studies** 12/2012 – 12/2024 | Durgapur, West Bengal
St. Xavier's School

Skills

- | | |
|-----------------|-----------------|
| Computer Vision | OpenCV |
| Python | Java |
| React | JavaScript |
| MediaPipe | Firebase |
| MySQL | API Integration |

Projects

- Arch** 07/2026 – 07/2026
Arch — An all-in-one personal life command center designed to track daily habits, tasks, workouts, expenses, academics, and personal goals in a single dashboard.
- Cenivo - Movie & TV Discovery Platform** 06/2026 – 06/2026
Modern AI-powered movie & TV discovery platform with personalized recommendations, watchlists, ratings, and real-time search.
- AirMouse AI** 06/2026 – 06/2026
AirMouse AI turns a standard webcam into a real-time, touchless mouse controller for Windows.
- Hill Climbing Race - 2D Driving Game** 06/2026 – 06/2026
Hill Climbing Race is a 2D physics-based driving game where players explore endless terrain.
